FLORIDA WALL & CEILING CONTRACTORS ASSOCIATION

ANNUAL EXECUTIVE'S CONFERENCE & TABLE TOP SHOW + NETWORKING

WEDNESDAY // JANUARY 14, 2026

- 3:00 - 5:00 PM **BOARD OF DIRECTOR'S MEETING** – The first meeting of the FWCCA Board of Directors wherein they will review the status of the association, finalize plans for the March Seminar and our fundraising event, Clay Shoot on March 27 in Sarasota.
- 6:00 - 7:30 PM **TABLE TOP/NETWORKING SESSION** - Another fun-filled event of socializing and networking with our premier associate members. There will be food sponsored by the association and it is a FREE event for all members. Be sure to take advantage of this prelude to the following day's line-up of top notch programming.

THURSDAY // JANUARY 15, 2026

7:30 AM **REGISTRATION & CHECK-IN W/CONTINENTAL BREAKFAST**

- 8:00 - 9:00 AM **CLASS I –“SILICA – IT'S MORE THAN JUST DUST – THE HEALTH HAZARDS OF SILICA (QUARTZ) IN CONSTRUCTION WORK” PRESENTED BY MIKE KAY, DIRECTOR, RESOURCE SAFETY SERVICE, SAFETY PRODUCTS, INC.**
A lung disease called “silicosis” is caused by breathing of dust carrying silica. The dust causes fibrosis or scar tissue formulation in the lungs. This reduces the lungs capability to extract oxygen from the air. THERE IS NO CURE

TOPICS TO BE COVERED:

- Written Exposure Control Plan
- Dust Control and Respirators
- Silica Health Hazards
- Training
- Housekeeping
- Record Keeping
- OSHA 1936.1155 Respirable Silica

- 9:00 - 10:00 AM **CLASS II - “AI IN ACTION: TRANSFORMING WALL & CEILING CONTRACTORS FOR THE NEXT GENERATION” PRESENTED BY – BRAD PARTRIDGE, PRESIDENT, SMALL BUSINESS AND ADVISORS**
This session will explore how AI is revolutionizing the wall & ceiling, drywall, stucco contracting industry. Large subcontractors and manufacturers are using AI to sharpen their competitive edge, boost project performance, and proactively manage risks- from automating preconstruction estimates and streamlining project management, to enhancing jobsite safety and optimizing prefab solutions. Attendees will receive an update on AI applications, and discover practical strategies, proven case studies, and step by step guidance for successfully integrating AI into their current business processes, The session will focus on AI opportunities while preparing executives to lead the next wave of digital transformation within the industry.

POINTS TO BE COVERED:

- An overview of how AI is impacting businesses and 2026 anticipated opportunities.
- Learn the latest AI-driven tools for estimating, scheduling, and project management-cutting costs and accelerating timelines on large-scale wall & ceiling projects.
- See real case studies of how contractors and manufacturers in Florida are using AI for enhanced safety, risk predictions and workforce productivity.
- Discover implementation strategies tailored for both new and experienced users-how to integrate AI with existing operations and measure business impact.

THIS IS A PROGRAM FOR BOTH LARGE AND SMALL CONTRACTORS AND MANUFACTURERS – DON'T MISS THIS GREAT LEARNING OPPORTUNITY!

10:00 - 10:10 AM

REFRESHMENT BREAK

10:15 - 11:15 AM

CLASS III – “DELIVERING VALUE TO THE VE FOR INSULATION” PRESENTED BY TONY NEWMAN, SALES DIRECTOR, FI-FOIL

This Program will present simple ways to increase the value and performance of insulation value engineering (VE) solutions to meet or exceed project goals.

SPECIFICS TO BE COVERED IN THIS PROGRAM

- Identifying the key aspects of an insulation specification to determine a path for an effective VE solution.
- Considering all paths available to meet the Code and leveraging the best approach to reach your goals.
- Exploring best practices with a group discussion.
- Understanding Reflective Insulation and how it works.
- Components of a winning VE and gaining repeat business.

11:15 - 12:15 AM

CLASS IV- “COLD FORMED STEEL FRAMING ENGINEERING & CONSIDERATIONS” PRESENTED BY ANDREW SIGEL, MARINOWARE

Marinoware cold-formed steel engineers are experienced in a wide variety of projects, from single story bypass to multi-story load-bearing. Our team of engineers provide full-service engineering and technical consultation to contractors, architects and structural engineers throughout the country. With a long-standing history of successful design work, the Marino/Ware Design Group delivers dependable expertise for every phase of your project and beyond.

This program will take a deeper dive into some of the considerations when choosing a design firm to work through your CFS Metal Framing Projects. The topics below will be discussed during the presentation illustrating the different components affiliated with the design group and their offerings to contractors.

TOPICS TO BE DISCUSSED:

- Delegated design and the cfs engineer
- Interior partition shops
- Difference between size & gauge estimate and engineering
- Types of wall conditions
- Common problem areas
- Items we need from contractor
- Sample drawing review

12:15 - 1:00 PM

LUNCH FOR ALL

1:00 - 3:00 PM

CLASS V - "PROTECTING YOURSELF FROM THE UNKNOWN PITFALLS OF STUCCO INSTALLATION" PRESENTED BY MIKE STARKS, JAY HESTER & HARRY LUBITZ.

After this program will be broken down into three sections as follows:

SECTION I – HARRY LUBITZ - VAPOR DRIVE

- What is permeability – warm, humid climates
- Wind drive rain rest – astm d6904
- Astm 331
- Current paint specification examples (generic information)
- Alternatives to block permeability (stucco admixtures)

SECTION II – JAY HESTER – SEALANTS

- Embedment of trims and sealants
- Proposed treatment for lath under windows

SECTION III – MIKE STARKS – SUBMITTALS

- Addressing problems up-front with the architect/specifier and your client
- Providing proper submittals and paperwork
- Plans/specifications & estimating
- Internal communications
- Documentation
- Window rough opening waterproofing – correct and incorrect installation

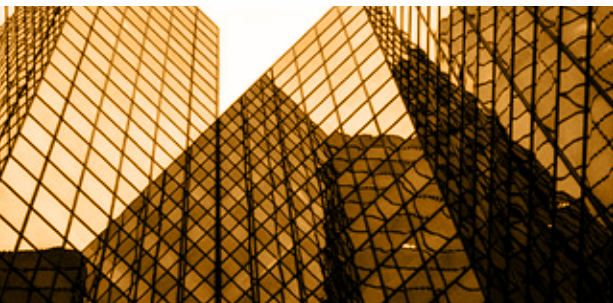

3:00 PM
